

Table 1: **Draft: extension of Uni-LoRA Table 5.** Published image-classification accuracy (% , mean $\pm$ standard deviation) is transcribed from Uni-LoRA (Li et al., 2025); its LP, full fine-tuning (FF), and FourierFT rows were sourced from FourierFT. ProLoSA rows specify planned adapter budgets; “_” means experiments are pending, including the eight-task average. All original parameter-count conventions are retained. New ProLoSA results require matched data and evaluation settings and five runs per cell.

Model	Method	Parameters	OxfordPets	StanfordCars	CIFAR10	DTD	EuroSAT	FGVC	RESISC45	CIFAR100	Avg.
